

QUICK SET-UP GUIDE

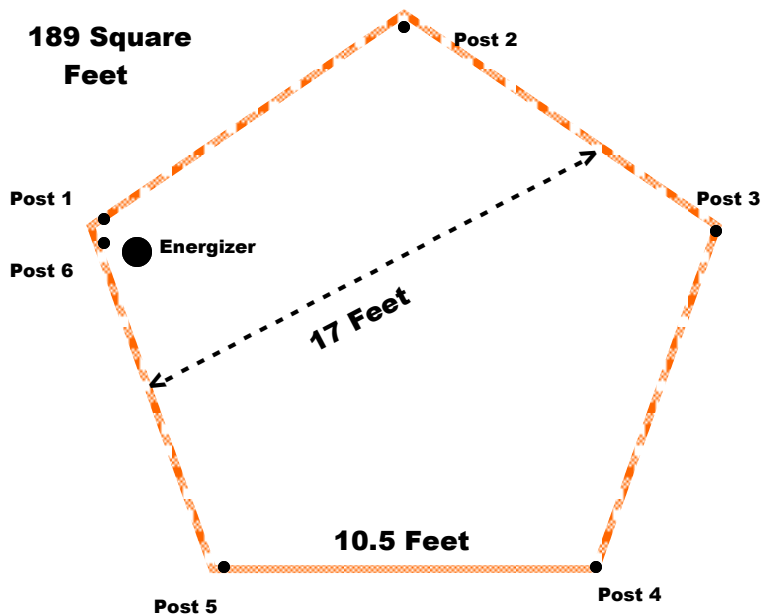

Pentagon Contents

Part	Qty
• Mesh Fence-1 Roll	53 feet
• Ground Rod	1 ea
• LED Lights (With LR41 Batteries)....	2 ea
• Ground Lead Wire	1 ea
• Storage Bag	1 ea
• Velcro Straps	3 ea
• Electric Fence Placard	1 ea
• Voltage Tester	1 ea
• Speedrite AN90 Energizer	1 ea

Requires - 4 D cell batteries (not included)

- Determine where you want the center of the enclosure and walk each post out approximately 10 feet.
- Arrange mesh fence in a pentagon shape, as shown above. Make sure orange wires are on the outside of the posts.
- Connect posts 1 & 6 with velcro straps - this serves as the opening and closing point.
- Once you have correct amount of tension, pound fence posts into the ground. Place the ground rod close to post 6, inside fence.
- Clip top and bottom electrical wires together with metal crimped tabs.
- To energize the fence connect the Yellow wire from the energizer to the metal clips on the fence. Connect the Green wire to the ground rod.
- Red & Black power leads are for optional 6/12 volt power source.
- Set energizer on “2” setting and place inside the enclosure
